CSA1522-Cloud computing and big data analytics
Experiment-3

Aim: Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

Procedure:

1. First, create a project named Cloud-Based Car Booking Reservation System.
2. Select a cloud service provider such as AWS to host the application.
3. Design a simple web page using HTML, CSS, and JavaScript.
4. Add fields such as From, To, Date, Passengers, Rental, Out Station, Package Type, and Hours/Days.
5. Create a database to store customer, car, and booking details.
6. Add different cars with their car name, type, capacity, and rental price.
7. Implement the Search Cabs option to find available cars based on the user's requirements.
8. Display the available cars along with their details and prices.
9. Access the application through a web browser using the cloud server address**.**
10. The application demonstrates SaaS because users can access the car booking software through the internet without installing it on their computers.
